Subject: RE: Soil and Water Results

Lou--

Do you have easy answers for these questions from Bernadette Carr? Do you have the sampling plan or QAPP available from that sampling event (for everything--soil samples, soil gas survey, and water sampling)? That way we can just send her those and not have to individually answer these questions.

thanks,

nicole

Thanks Nicole. I look forward to your reply. I hope that you are feeling better. It seems that something must be going around. The parent's meeting was productive. I believe we have a solid network and are increasing our membership. So that is good.

Bernadette--

sorry I have not replied sooner--I have been out sick. I won't be able to get you answers for this stuff until early next week. I have a public meeting for another site tonight and I am off tomorrow. Most of these should not be hard to answer, however.

How did the parents' meeting on Monday go?

For future lists of questions, it would helpful for me if you could get them to me well in advance of your deadline. That way you will be assured of getting complete answers in time.

I will get in touch with you next week.

take care,

nicole

Hi Nicole, I had not received an answer on the following questions. As you know tonight is the meeting for the IDOC members and it would be great if I could forward them any information on this. I'll send my questions and if you can answer please do, if not, please let me know when you might be able to provide me with the information. Thanks!

QUESTIONS

SOIL

1. When did the soil samples occur?
2. Where were the samples taken?
3. What equipment was used?
4. From what depth were the soil samples?
5. What chemicals were tested for? And what chemicals were found?
6. What were the preliminary results of the test?
7. What were the confirmed results of the test or when do you expect to receive them?
8. What was the reason for the plastic lining would be underneath the playground?
9. At what depth did they run across the plastic lining?
10. Did you discover any other surfaces other than the plastic lining, soil, and woodchips?

WATER

1. Please provide me with any information that you may have on the water testing.
